YELLOWHEAD MINING INC.
Management Discussion and Analysis
Three months ended March 31, 2014
(In Canadian dollars unless otherwise stated)

This Management Discussion and Analysis ("MD&A") of Yellowhead Mining Inc. should be read in conjunction with the Company's condensed consolidated interim financial statements and related notes for the three months ended March 31, 2014. The Company's condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard ("IAS") 34, 'Interim Financial Reporting'. This MD&A should also be read in conjunction with the Company's audited consolidated financial statements and related notes for the twelve months ended December 31, 2013, prepared under International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). All dollar amounts included therein and in this MD&A are expressed in Canadian Dollars unless otherwise noted. The information contained within this MD&A is current to May 7, 2014. Additional information of the Company is available on SEDAR at www.sedar.com.

1. HIGHLIGHTS

Key highlights for the three months ended March 31, 2014 and subsequent weeks include:

- Initiating the update of the feasibility study for the Harper Creek Project ("Harper Creek Project"), including updating the resource and reserve estimates, and updating estimates of initial capital costs, sustaining capital costs and operating costs, as well as the financial analysis.
- Initiating the revision of the application for an environmental assessment certificate ("EA Application") for the Harper Creek Project.
- As at March 31, 2014 the Company had cash and cash equivalents of \$8.38 million.

2. OVERVIEW

Yellowhead Mining Inc. ("Yellowhead" or the "Company") was incorporated on August 23, 2005 under the laws of British Columbia. The Company is a development stage company engaged in the acquisition, exploration and development of mineral properties with its focus on the development of the Harper Creek Project, which is located in south central British Columbia, Canada. The Company's shares trade on the Toronto Stock Exchange ("TSX") under the symbol YMI.

Corporate Structure

Yellowhead Mining Inc. was listed for trading on the TSX Venture on November 17, 2010 under the trading symbol "YMI". On June 11, 2012, Yellowhead Mining Inc. graduated from the TSX Venture to the TSX under the trading symbol "YMI".

Additional disclosures pertaining to the Company's filings, technical reports, management information circulars, annual information forms, material change reports, press releases and other information are available on SEDAR at www.sedar.com.

2. OVERVIEW (Continued)

Harper Creek Project

The Harper Creek Project is 100% owned by the Company and is a copper-gold-silver deposit located approximately 150 km by road north-northeast of the city of Kamloops in Vavenby, B.C. The property is 15km east of the community of Clearwater and adjacent to the Yellowhead Highway, the Canadian National Railways' transcontinental mainline and 12km from the BC Hydro power sub-station in the town of Vavenby. The Harper Creek Project was originally explored by Noranda and US Steel during the 1960's and 1970's. The Harper Creek Project is comprised of 131 mineral tenures covering 42,636 hectares and on January 31, 2014 the Company extended all 131 of its mineral tenures through to November 3, 2024.

3. OUTLOOK

The Company's principal activities for 2014 include:

Updated Feasibility Study

In January 2014, the Company initiated an update of the feasibility study for the Harper Creek Project, including updating the resource and reserve estimates to incorporate results from the in-fill drill program undertaken during 2012-2013, updating estimates of initial capital costs, sustaining capital costs and operating costs, as well as updating the financial analysis of the project. The updated feasibility study will also incorporate a series of design changes that have been made to the Harper Creek Project over the past two years in order to further mitigate potential environmental impacts resulting from the development of the Harper Creek Project. The updated feasibility study will also form an integral component of the revised EA application. The Company's target date for completion of the updated feasibility study is by the end of the second quarter of 2014.

Environmental Permitting

In April 2013, the Company submitted an EA Application for the Harper Creek Project to the Environmental Assessment Office ("EAO"). The EA Application meets the requirements of an environmental assessment pursuant to both the BC Environmental Assessment Act ("BCEAA") and the Canadian Environmental Assessment Act ("CEAA"). In May 2013, the EAO identified a number of deficiencies with, and provided a number of comments on, the EA Application.

In January 2014, the Company initiated an update and revision of the EA Application to include and reflect both additional baseline data collected during 2013-2014, as well as to address the deficiencies and comments raised by the EAO. The update and revision includes updated baseline reports, effects assessments, and proposed mitigation measures, as well as developing a suite of environmental management plans to cover all phases of operations from pre-construction, through construction, operations, closure and reclamation. The Company's target date for completion of the updated and revised EA Application, and re-submission to the EAO, is by the end of the third quarter of 2014.

3. OUTLOOK (Continued)

Upon re-submission by the Company of the EA Application to the EAO, the EA Application will enter a 30-day screening process led by the EAO and EAO Working Group. If the EAO considers that the EA Application has met the requirements of the terms of reference for the EA Application, then the EA Application will be accepted into the 180-day review phase. The public, First Nations, Provincial and Federal regulators on the EAO Working Group will be involved in the EA Application review phase. Following the review phase, the EA application goes to the Federal and Provincial governments for a final decision on granting an environmental assessment certificate for the Harper Creek Project.

First Nations and Public Consultation

The Company has been engaged in discussion and consultation with local First Nations since 2006, and has been in discussions regarding an Impact Benefits Agreement (“IBA”) since 2011. The purpose of the IBA is to offer economic benefits, business, training, employment and capacity-building opportunities providing long-term sustainable benefits for the communities. The Company has also offered to support the development of community businesses, and provide employment and capacity building opportunities associated with the development and operations of the Harper Creek Project to local First Nations. The Company is committed to developing effective partnerships and good working relationships with local First Nations based on mutual respect, open communications and sharing of information. The IBA negotiations are on-going.

The Company has also been engaged in public consultation with all stakeholders, including local communities and local First Nations, regarding any potential environmental and socio-economic impacts of the development of Harper Creek and the Company’s proposed mitigation strategies.

4. CORPORATE ACTIVITY

Key corporate developments for the Company for the three months ended March 31, 2014 and subsequent weeks are discussed below.

Effective January 4, 2014, Lori Price, previously the Controller of the Company, was appointed as Chief Financial Officer of the Company upon the resignation of Saurabh Handa, the former Chief Financial Officer of the Company. Ms. Price is a Certified General Accountant with a Bachelor of Commerce from the University of British Columbia and has over twenty years’ experience in the mining industry.

5. SUMMARY OF QUARTERLY RESULTS

(Amounts are expressed in thousands of Canadian dollars, except per-share amounts)

Quarter Ended	2014	2013				2012		
	31-Mar	31-Dec	30-Sep	30-Jun	31-Mar	31-Dec	30-Sep	30-Jun
Administrative expenses	\$ 519	\$ 920	\$ 985	\$ 789	\$ 984	\$1,881	\$ 908	\$1,139
Exploration and evaluation expenses	918	194	268	447	1,956	2,845	2,093	913
Other (income)/expenses	(22)	107	(8)	3	(129)	(11)	(14)	6
Net loss and comprehensive loss for the period	1,415	1,220	1,245	1,239	2,811	4,715	2,987	2,058
Basic and diluted loss per share for the period	\$ 0.01	\$ 0.02	\$ 0.02	\$ 0.02	\$ 0.04	\$ 0.08	\$ 0.06	\$ 0.04

The Company's changes in financial results on a quarter by quarter basis are due primarily to fluctuations in the level of activity of project development, investor relations and administration. The Company has continued to develop the technical and economic feasibility of the Harper Creek Project and the expenditures by the Company reflect this development.

6. RESULTS OF OPERATIONS

The operating results of junior mining companies can fluctuate significantly from period to period. Being in the development stage, the Company has no revenue from operations.

Review of Quarterly Financial Results - Three months ended March 31, 2014 ("Q1 2014") compared to the three months ended March 31, 2013 ("Q1 2013")

The Company recorded a net loss of \$1,415K for Q1 2014, as compared to a net loss \$2,811K for Q1 2013. The decrease in the loss of \$1,396K was attributable to the following key items:

Consulting fees were \$8K for Q1 2014, as compared to \$35K for Q1 2013. The Company used fewer consultants in Q1 2014 compared to Q1 2013 and this resulted in a reduction of \$27K in consulting fees.

Regulatory filing fees were \$26K for Q1 2014, as compared to \$72K for Q1 2013. This decrease of approximately \$46K resulted primarily from the Company's voluntary delisting from the OTCQX in September 2013 and additional TSX fees in Q1 2013 compared to Q1 2014.

Investor relations costs were \$18K for Q1 2014, as compared to \$83K for Q1 2013. This decrease of \$65K was due to a decrease in investor relations activities and travel costs by the Company in Q1 2014 as compared to Q1 2013. The majority of investor relations costs are non-recurring and therefore these costs vary with the level of investor relations activity by the Company.

Professional fees were \$25K for Q1 2014, as compared to \$207K for Q1 2013. This decrease of \$182K was due to three main factors: First, the Company incurred approximately \$64K less legal costs in Q1 2014 as compared to Q1 2013 due to additional corporate matters in Q1 2013 requiring legal costs to be incurred. Second, the Company incurred approximately \$27K in recruiting fees in Q1 2013 related to the Company's ongoing search for a new CEO and these costs were not incurred in Q1 2014. Third, the Company incurred \$60K in professional fees in Q1 2013 related to various strategic initiatives of the Company and these costs were not incurred in Q1 2014.

YELLOWHEAD MINING INC.
Management Discussion and Analysis
Three months ended March 31, 2014
(In Canadian dollars unless otherwise stated)

6. RESULTS OF OPERATIONS (Continued)

Wages and benefits were \$314K for Q1 2014, as compared to \$398K for Q1 2013. This decrease of approximately \$84K was mainly due to fewer employees in Q1 2014 compared to Q1 2013.

The principal reason for the decrease in the net loss is the lower exploration and evaluation expenses in Q1 2014 compared to Q1 2013. Exploration and evaluation expenses were \$918K for Q1 2014, as compared to \$1,956K for Q1 2013. This decrease of approximately \$1,038K was due mainly to the in-fill drilling program undertaken in Q1 2013. In Q1 2014 there were no drilling costs and exploration costs related mainly to the initiation of the update of both the feasibility study and the EA Application for the Harper Creek Project. Environmental assessment costs increased from \$290K in Q1 2013 to \$665K in Q1 2014 in support of activities needed to support the re-submission of the EA Application.

Other income was lower for Q1 2014 as compared to Q1 2013 due to the recognition of the flow-through share premium liability of \$107K in Q1 2013. The recognition of the flow-through share premium liability was related to the renunciation of qualifying expenditures by the Company related to the flow-through shares that were issued by the Company in December 2012 and where the expenditures needed to be incurred before December 31, 2013. All the required expenditures were incurred by the Company in Q1 2013.

7. HARPER CREEK EXPENDITURES

As at March 31, 2014, a summary of the Company's mineral property expenditures at Harper Creek is as follows:

	Capitalized mineral interests	Exploration and evaluation expenses	Total expenditures on Harper Creek
Balance, December 31, 2013	\$ 885,235	\$ 32,162,432	\$ 33,047,667
Assaying	-	6,225	6,225
Contract wages	-	3,046	3,046
Engineering	-	197,159	197,159
Environmental assessment	-	664,524	664,524
Equipment rental	-	9,895	9,895
Reports, drafting and maps	-	33,074	33,074
Other	-	4,363	4,363
Balance, March 31, 2014	\$ 885,235	\$33,080,718	\$33,965,953

Further details of capitalized mineral interests (Note 7) and exploration and evaluation expenditures (Note 5) are disclosed in the Company's condensed consolidated interim financial statements as at and for the three months ended March 31, 2014.

8. FINANCIAL INSTRUMENTS

Designation and valuation of financial instruments

The Company has designated its cash and cash equivalents and accounts receivable as loans-and-receivables; and accounts payable and accrued liabilities and due to related parties as other-financial-liabilities.

GST receivable is excluded from financial instruments as it arises from statutory requirements imposed by the Government of Canada.

The carrying values of cash and cash equivalents, accounts payable and accrued liabilities, and due to related parties approximate their fair values because of the short-term maturity of these financial instruments.

The following tables summarizes the designation of the Company's financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to 3 based on the degree to which the inputs used to determine the fair value are observable:

- Level 1 of the fair value hierarchy includes unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 of the hierarchy includes inputs that are observable for the asset or liability, either directly or indirectly; and
- Level 3 includes inputs for the asset or liability that are not based on observable market data.

The Company does not have any financial instruments included in Level 1, 2 and 3.

The Company's financial instruments as at March 31, 2014 are as follows:

	As at March 31, 2014
Financial assets	
Loans-and-receivables	
Cash and cash equivalents	\$ 8,382,215
Accounts receivable	5,265
Total financial assets	\$ 8,387,480
Financial liabilities	
Other-financial-liabilities	
Accounts payable and accrued liabilities	\$ 461,251
Due to related parties	17,546
Total financial liabilities	\$ 478,797

8. FINANCIAL INSTRUMENTS (Continued)

The financial risk arising from the Company's operations are credit risk, liquidity risk and market risk. These risks arise from the normal course of operations and all transactions undertaken are to support the Company's ability to continue as a going concern. The risks associated with these financial instruments and how the Company minimizes these risks are set out below. The Company manages and monitors these exposures to ensure appropriate measures are implemented in a timely and effective manner.

(a) Credit Risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company is exposed to credit risk with respect to its cash and cash equivalents; however, this is minimized as cash and cash equivalents are placed with major Canadian financial institutions with strong investment-grade ratings as determined by a primary ratings agency.

(b) Liquidity Risk

Liquidity risk is the risk that the Company will not have sufficient cash to meet its financial obligations as they become due.

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when they are due. This is achieved by ensuring that no liabilities are incurred that the Company does not have the ability to discharge in 30 days or less. The Company also has policies in place that establish minimum working capital levels below which expenditures of the Company are reduced until the minimum working capital level is re-established. On March 31, 2014, the Company had cash and cash equivalents of \$8,382K available to settle current liabilities of \$479K. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

(c) Market Risk

Market risks consist of interest rate risk, foreign currency risk and other price risk.

The Company's cash and cash equivalent balance is held in savings accounts and money market instruments which pays interest of approximately 1% and 1.42% respectively. The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary assets and liabilities.

Foreign currency risk is the risk that the fair values or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. All of the Company's financial assets and the majority of the Company's financial liabilities are denominated in Canadian Dollars and therefore the Company is not currently exposed to foreign currency risk.

Other price risk is the risk that the fair values or future cash flows of a financial instrument will fluctuate due to changes in market prices other than from interest rate and foreign currency risk. The Company is not exposed to other price risk.

YELLOWHEAD MINING INC.
Management Discussion and Analysis
Three months ended March 31, 2014
(In Canadian dollars unless otherwise stated)

9. LIQUIDITY AND CAPITAL RESOURCES

The Company's working capital as at March 31, 2014 was \$8,325K as compared to working capital of \$9,700K at December 31, 2013, representing a decrease in working capital of \$1,375K. Included in working capital were cash and cash equivalents of \$8,382K (December 31, 2013 - \$9,996K).

(a) Financing

The Company's cash provided by financing activities for the three months ended March 31, 2014 and for the three months ended March 31, 2013 was \$nil.

The two most recent financing completed by the Company are set out below:

(i) Private Placement - December 2012

Placement

On October 31, 2012, the Company announced plans to complete a non-brokered private placement of up to a maximum of 13,000,000 common shares of the Company. On December 27, 2012, the Company issued 8,032,307 common shares at a price of \$0.65 per share for gross cash proceeds of \$5,221K and paid finder's fees associated with this placement of \$261K. The Company also issued 2,141,403 flow-through common shares at a price of \$0.70 per share for gross cash proceeds of \$1,499K. Share capital was reduced by the premium attributed to the flow-through shares of \$0.05 per share or \$107K and the Company paid finder's fees associated with this flow-through placement of \$83K. The Company also incurred legal costs of \$43K with relation to the private placement of the common shares and flow-through shares which was treated as share issue costs.

Use of Proceeds

The Company planned to use the net proceeds from the financings above to carry out the following activities:

- An in-fill drilling program of up to 11,000m of drilling. Pursuant to a side-letter signed with a major investor in this placement the Company was required to spend approximately \$3,000K on an in-fill drilling program (The Company completed all required work in 2013 as specified in the side-letter).
- Working capital, general and administrative expenses and other general corporate purposes

The Company's actual use of such proceeds did not vary from the anticipated use of proceeds set out above.

(ii) Convertible Debenture - November 2013

Convertible Debenture

On November 19, 2013, the Company issued a convertible debenture to Matco Investments Ltd. ("Matco") for \$8,000K. The debenture matured on January 31, 2014 and bore interest at a rate of 9% per annum, calculated and payable monthly in arrears. The debenture was secured by a first ranking security interest on all of the Company's property and assets. All security was to be released and discharged on the earlier of: 1) the automatic conversion of the convertible debenture, and 2) repayment of the convertible debenture together with accrued interest. The full conversion of the convertible debenture into 35,555,556 common shares of the Company at a price of \$0.225 per share was subject to shareholder approval.

9. LIQUIDITY AND CAPITAL RESOURCES (Continued)

On December 30, 2013, the Company's shareholders approved the full automatic conversion of the convertible debenture into 35,555,556 common shares of the Company at a conversion price of \$0.225 per share. Costs of \$79K related to the issuance and conversion of the convertible debenture were capitalized as share issues costs in share capital.

Use of Proceeds

The Company plans to use the net proceeds from the financing above to carry out the following activities:

- Complete the environmental assessment process for the Harper Creek Project
- Working capital, general and administrative expenses and other general corporate purposes

To date, the Company's actual use of such proceeds has not varied from the anticipated use of proceeds set out above.

(b) Capital Resources

The Company's focus for the current fiscal year and going forward is the development of the Harper Creek Project. The major expenses that will be incurred by the Company in the next twelve months will be costs associated with the updated feasibility study, the updated and revised EA Application and general and administrative activities. Following the completion of the financing by the Company in the fourth quarter of 2013, the Company believes its current working capital is sufficient for the next twelve months of general and administrative activities and to complete the EA Application, however, additional funding will be required by the Company to undertake the mine permitting process, undertake detailed engineering, place deposits on long lead equipment items, and arrange project financing for the construction of the Harper Creek Project.

If adequate funds are not available when required, the Company may, based on the Company's cash position, delay, scale back or eliminate various programs. In the future the Company may receive additional funds through the exercise of stock options. The Company may also seek to raise additional funds in the future through the sale of additional common shares either as a private placement or via a common share offering, seeking a strategic partnership or through the debt markets.

Although the Company has successfully raised capital in the past, there can be no assurance that the Company will have sufficient financing to meet its future capital requirements or that future additional financing will be available to the Company at terms it finds acceptable or at all.

9. LIQUIDITY AND CAPITAL RESOURCES (Continued)

(c) Commitments

As at March 31, 2014 the Company had the following contractual commitments:

Rental Commitments

The Company has commitments related to the minimum rental and operating expenses payments for the Company's office space in downtown Vancouver. The lease was effective September 1, 2011 and concludes on August 31, 2016. These commitments in each of the next three years to the conclusion of the lease period are approximately as follows:

Year Incurred	Amount
2014	\$ 93,400
2015	127,300
2016	86,200
Total commitments	\$ 306,900

Capital Expenditure Commitments

The Company does not currently have any capital expenditure commitments.

(d) Off-Balance Sheet Arrangements

The Company does not utilize off-balance sheet arrangements.

(e) Proposed Transactions

The Company has no proposed transactions.

10. RELATED PARTY TRANSACTIONS

Transactions with related parties for the three months ended March 31, 2014 are detailed below:

- During the three months ended March 31, 2014, the Company paid and accrued project management fees, exploration expenses and rental costs of \$25K (March 31, 2013 - \$511K) to CME Consultants Inc. ("CME"), a contractor company whose president is a director of the Company's 100% owned subsidiary Harper Creek Mining Corp. The majority of costs paid to CME during the three months ended March 31, 2013 were related to the management of the infill drilling program announced in November 2012. As at March 31, 2014, the balance owing to CME was \$13K.
- During the three months ended March 31, 2014, the Company paid and accrued management fees of \$14K (March 31, 2013 - \$66K) to Twinstone Ventures Inc. ("Twinstone"), a company related to the Chairman of the Board of Directors of the Company. During the three months ended March 31, 2014, the Company paid Twinstone management fees and for the three months ended March 31, 2013 the Company paid Twinstone for services performed as the interim CEO of the Company. As at March 31, 2014, the balance owing to Twinstone was \$5K.

These transactions, occurring in the normal course of operations are measured at the estimated fair value of the services provided or goods received.

YELLOWHEAD MINING INC.
Management Discussion and Analysis
Three months ended March 31, 2014
(In Canadian dollars unless otherwise stated)

11. OUTSTANDING SHARE DATA

The Company is authorized to issue an unlimited number of common shares without par value. As at May 7, 2014, the Company had 99,005,726 common shares issued and outstanding.

The Company has the following stock options that are outstanding and exercisable as at May 7, 2014:

Exercise price	Outstanding		Exercisable	
	Number outstanding	Weighted average remaining life (years)	Number exercisable	Weighted average remaining life (years)
\$0.24	1,377,000	3.87	533,664	3.42
\$0.26	500,000	4.15	-	-
\$0.60	30,000	3.78	20,000	3.78
\$0.62	100,000	3.62	41,665	3.62
\$1.08	750,000	1.19	750,000	1.19
\$1.25	2,387,500	2.25	2,047,260	2.13
	5,144,500	2.75	3,392,589	2.15

12. CRITICAL ACCOUNTING JUDGEMENTS AND ESTIMATES

The Company's management is required to make judgements in the process of applying the Company's accounting policies in the preparation of its consolidated financial statements. The Company's significant accounting policies are presented in Note 3 of the audited annual consolidated financial statements for the year ended December 31, 2013. In addition, the preparation of consolidated financial statements in accordance with IFRS requires that the Company's management make assumptions and estimates of effects of uncertain future events on the carrying amounts of the Company's assets and liabilities at the end of the reporting period and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates as the estimation process is inherently uncertain. Estimates are reviewed on an ongoing basis based on historical experience and other factors that are considered to be relevant under the circumstances. While management believes the estimates are reasonable, actual results could differ from these estimates and could impact future results of operations and cash flows. Revisions to estimates and the resulting effects on the carrying amounts of the Company's assets and liabilities are accounted for prospectively.

(a) Critical Judgements in Applying Accounting Policies

Impairment of property, plant and equipment and mineral interests

Assets or cash generating units are evaluated at each reporting date to determine whether there are any indications of impairment. The Company considers both internal and external sources of information when making the assessment of whether there are indications of impairment for the Company's property plant and equipment and mineral interests. External sources of information considered are changes in the Company's economic, legal and regulatory environment which it does not control but affect the recoverability of its mining assets. Internal sources of information the Company considers include the manner in which mining properties and plant and equipment are being used or are expected to be used and indications of economic performance of the assets.

If any indication of impairment exists, a formal estimate of recoverable amount is performed and an impairment loss recognized to the extent that carrying amount exceeds recoverable amount. The recoverable amount of an asset or cash generating group of assets is measured at the higher of fair value less costs to sell and value in use.

As at March 31, 2014, the Company believes there are no indications of impairment for the carrying value of its property plant and equipment and mineral interests.

Taxation

The provision for income taxes and composition of income tax assets and liabilities requires management's judgment as to the types of arrangements considered to be a tax on income in contrast to an operating cost. Judgment is also required in assessing whether deferred tax assets and certain deferred tax liabilities are recognized in the statement of financial position.

Assumptions about the generation of future taxable profits depend on management's estimates of future cash flows. These depend on estimates of future production and sales volumes, commodity prices, reserves, operating costs, and other capital management transactions. The application of income tax legislation also requires judgments. These judgments and assumptions are subject to risk and uncertainty, therefore there is a possibility that changes in circumstances will alter expectations, which may impact the amount of deferred tax assets and deferred tax liabilities recognized on the

12. CRITICAL ACCOUNTING JUDGEMENTS AND ESTIMATES (Continued)

statement of financial position and the amount of other tax losses and temporary differences not yet recognized.

Mining exploration tax credits

The Company is entitled to refundable tax credits on qualified mining exploration expenses incurred in the province of British Columbia. Management's judgment is applied in determining whether the mining exploration expenses are eligible for claiming such credits. Those benefits are recognized when the Company estimates that it has reasonable assurance that the tax credits will be realized. Upon review of the mining exploration tax credit claim by the Canada Revenue Agency, any adjustments to the estimate made by the Company are recorded in the period of the tax assessment.

(b) Critical Estimates in Applying Accounting Policies

Estimated reserves, resources and exploration potential

Reserves are estimates of the amount of product that can be extracted from the Company's properties, considering both economic and legal factors. Calculating reserves and estimates requires decisions on assumptions about geological, technical and economic factors, including quantities, grades, production techniques, recovery rates, production costs, transport costs, commodity demand, prices and exchange rates. Estimating the quantity and/or grade of reserves require the analysis of drilling samples and other geological data. Estimates of reserves may change from period to period as the economic assumptions used to estimate reserves change from period to period, and because additional geological data is generated during the course of operations. Changes in reported reserves may affect the Company financial position.

Fair value of share-based compensation

The Company grants share-based awards to certain officers, employees, directors and other eligible persons. For equity settled awards, the fair value is charged to the consolidated statement of comprehensive income and credited to the related reserve account, on a straight-line basis over the vesting period, after adjusting for the estimated number of awards that are expected to vest. The fair value of the equity-settled awards is determined at the date of the grant using the Black-Scholes option pricing model. Option pricing models require the input of highly subjective assumptions, including the expected price, expected volatility and expected life of the options. Changes in these assumptions can materially affect the fair value estimate and, therefore, the existing models do not necessarily provide a reliable measure of the fair value of the Company's stock options.

Amortization rates for PPE

Property, plant and equipment is recorded at cost less accumulated amortization and accumulated impairment losses. Amortization is provided at rates calculated to write off the cost of PPE, less their estimated residual value, using the straight-line method or unit-of-production method over their expected useful lives. Estimates of residual values and useful lives are reassessed annually and any change in estimate is taken into account in the determination of remaining amortization charges. Amortization commences on the date when the asset is available for use.

Decommissioning, restoration and similar liabilities

Decommissioning and restoration obligation provisions represents management's best estimate of the present value of the future costs. Significant estimates and assumptions are made in determining the amount of obligations provisions. Those estimates and assumptions deal with uncertainties such as: requirements of the relevant legal and regulatory framework; the magnitude of possible disturbance; and the timing, extent and costs of required restoration and rehabilitation activity.

12. CRITICAL ACCOUNTING JUDGEMENTS AND ESTIMATES (Continued)

These uncertainties may result in future actual expenditures differing from the amounts currently provided.

13. CHANGES IN ACCOUNTING POLICIES

There has been no change in the Company's significant accounting policies from those disclosed in Note 3 of the Company's audited consolidated financial statements for the twelve months ended December 31, 2013.

14. DISCLOSURE AND INTERNAL CONTROLS OVER FINANCIAL REPORTING

Internal controls over financial reporting are designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with IFRS. Management is also responsible for the design of the Company's internal control over financial reporting in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS.

The Company's internal controls over financial reporting include policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail accurately and fairly reflect the transactions and disposition of assets;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with IFRS and that receipts and expenditures are being made only in accordance with authorization of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets that could have a material effect on the financial statements.

Disclosure controls and procedures are designed to provide reasonable assurance that all relevant information is recorded, gathered and reported to the Company's senior management, including the Chief Executive Officer and Chief Financial Officer, on a timely basis to allow appropriate decisions to be made regarding required disclosure.

Because of their inherent limitations, internal controls over financial reporting can provide only reasonable assurance and may not prevent or detect misstatements. Furthermore, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

During the quarter ended March 31, 2014, no material changes were made to the Company's disclosure and internal controls over financial reporting. The Company is committed to monitor and improve the control environment on an ongoing basis.

15. RISK FACTORS

Yellowhead is engaged in mineral exploration and development activities which, by their nature, are speculative due to the high risk nature of the business and the present stage of the development of the Harper Creek Project. Any investment in the common shares of Yellowhead should be considered a highly speculative investment due to the nature of the Company's business. Such risk factors could materially affect Yellowhead's future financial results and could cause actual results and events to differ materially from those described in forward looking statements and forward looking information relating to Yellowhead or the business, property or financial results, any of which could cause investors to lose part or all of their investment in Yellowhead. For a detailed discussion of the risk factors associated with the Company please consult the risk factors section of the Company's most recent Annual Information Form filed on SEDAR at www.sedar.com.

16. FORWARD-LOOKING STATEMENTS

This MD&A may contain "forward-looking statements" which reflect the Company's current expectations regarding the future results of operations, performance and achievements of the Company including but not limited to statements with respect to the Company's plans or future financial or operating performance; the estimation of mineral reserves and resources; the realization of mineral reserve estimates; conclusions of economic assessments of projects; the timing and amount of estimated future production; future capital expenditures; costs and timing of the development of deposits; success of exploration activities; permitting time lines; requirements for additional capital; sources and timing of additional financing; realization of unused tax benefits; and the future price of gold, silver and copper. The Company has tried, wherever possible, to identify these forward-looking statements by, among other things, using words such as "plan", "project", "intend", "anticipate," "believe," "estimate," "expect", "budget", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved".

Forward-looking statements reflect the current beliefs of the management of the Company, and are based on currently available information. Accordingly, these statements are subject to known and unknown risks, uncertainties and other factors, which could cause the actual results, performance, or achievements of Yellowhead Mining Inc. to differ materially from those expressed in, or implied by, these statements. These uncertainties are factors that include but are not limited to risks related to the current global financial condition; the inherent risks involved in the exploration and development of mineral properties; the uncertainties involved in interpreting drilling results and other geological data; uncertainties related to completion results of planned exploration and development programs on the Company's material properties; metal price volatility; economic and political events affecting metal supply and demand; fluctuation in ore grade or recovery rates; fluctuations in tonnes of ore milled; possible variations in mineral resources; the possibility of project cost overruns or unanticipated costs and expenses; issuance of licenses and permits; the availability of and costs of financing needed in the future; increases in market prices of mining consumables and capital equipment; accidents; labour disputes; title disputes; claims and limitations on insurance coverage; delays in obtaining governmental approvals; changes in national and local government regulation of mining operations; and changes in tax rules and regulations. Although Yellowhead Mining Inc. has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking, there may be other factors that cause actual results to differ materially from those anticipated in such statements. Accordingly, the reader is cautioned not to place undue reliance on forward-looking statements.

YELLOWHEAD MINING INC.
Management Discussion and Analysis
Three months ended March 31, 2014
(In Canadian dollars unless otherwise stated)

Forward-looking statements are made as of the date hereof and accordingly are subject to change after such date. Forward-looking statements are provided for the purpose of providing information about management's current expectations and plans. Yellowhead Mining Inc. does not undertake to update any forward-looking statements that are included in this document if circumstances, management's estimates or management's expectations change, except in accordance with applicable securities laws.
